PROFILE

I am an experienced developer specializing in interactive web applications. I am passionate about creating delightful user experiences using various web technologies. I recently moved from the UK to Canada and have an open work permit.

WORK EXPERIENCE

11/2024 – present
Remote, Canada

Senior Software Engineer CNN

- Developed enhancements to internal tooling which improved usability and overall user experience, helping ensure alerts reached millions of customers promptly as news broke.
- Collaborated closely with cross-functional teams to gather feedback and identify areas for improvement, ensuring the tools met the evolving needs of our users.
- Implemented user-friendly interfaces that streamlined operations, helping reduce response times and increase overall efficiency in alert dispatch.

12/2023 – 10/2024
Remote, Canada

Senior Software Engineer LOGO.com | Free Logo Maker

- Led a large-scale project to integrate a new third-party merchandise provider, developing new APIs and Microservices, which empowered our users with powerful tools to elevate their brands through custom-printed products.
- Overhauled the domain purchase flows to ensure cohesive and accessible experiences for all users, resulting in a remarkable 300% increase in domain sales, significantly boosting our revenue.
- Integrated OpenAI into our platform to provide customers with additional tools that helped them develop and improve their brands, enhancing user satisfaction and engagement.

09/2021 – 02/2023
Remote, United Kingdom

Software Engineer Webflow

- Collaborated with accessibility team members to improve accessibility features in the Audit panel and default element accessibility, which empowered our customers to create more compliant and accessible websites.
- Led the initiative to automate accessibility testing, which encouraged a culture of accessibility-first development across the team and streamlined our processes.

05/2018 – 08/2021
Glasgow, Scotland

Senior Software Engineer FanDuel

- Led a team of front-end engineers, focusing on the account and wallet screens, which enhanced our users' overall experience with the platform.
- Developed a cohesive user experience by ensuring all parts of the UI adhered to the design patterns established by the user experience and design teams, helping maintain consistency and usability.
- Mentored other front-end engineers, which facilitated their quick integration into the team and empowered them to become productive members who thrived in their roles.

01/2018 – 05/2018
Glasgow, Scotland

UI Developer Cronin Group Plc

- Led an initiative to create automation pipelines, which ensured consistent and

WORK EXPERIENCE

high-quality code across both web and back-end teams.

- Developed improved workflows that resulted in quicker development and release times for all engineering teams, helping to enhance overall productivity.

01/2016 – 01/2018
Glasgow, Scotland

Web Developer CGI

- Developed the online jury response system for England and Wales, which provided a user-friendly experience that adhered to GDS Guidelines, making the system accessible for a wide range of users.
- Created a comprehensive suite of end-to-end tests that translated business requirements into actionable test steps, helping to ensure that both stakeholders and non-technical team members could have confidence in the solutions delivered.

02/2015 – 01/2016
Glasgow, Scotland

Web Developer Everyone

- Developed and maintained client websites, focusing on e-commerce solutions which enhanced user experience and increased client sales.
- Collaborated closely with the design team to create pixel-perfect and modern web interfaces, ensuring high performance and visual appeal for users.

05/2013 – 02/2015
Glasgow, Scotland

Web Developer Scotia Software

- Translated traditional paper-based workflows into effective digital solutions, helping clients enhance productivity and drive revenue growth.
- Collaborated closely with stakeholders to understand their needs, ensuring that the software met specific requirements and provided tangible benefits.

12/2011 – 05/2013
Castle Douglas, Scotland

Web Developer SuperControl

- Developed new features and integrations for self-catering management systems, which improved functionality and streamlined user operations.
- Created client websites that were closely integrated with SuperControl, enhancing the overall user experience and driving user engagement.
